

DATA

Clean data, reliable feeds and useful answers.

Collection infrastructure, catalog pipelines, BI and machine-learning workflows built for the decisions your team makes.

We connect the data you need to the decisions it supports. That can mean keeping competitor prices current, syncing a retail catalog, consolidating cash positions or turning operational data into a dashboard your team can act on.

What we build

Scraping and feed rescue with retries, monitoring and clear failure handling Competitor pricing, availability and market monitoring Catalog extraction, normalisation and Shopify synchronisation Power BI, Looker Studio, cash forecasting, segmentation and research models

How the work is measured

Feed uptime, and how stale the data gets before anyone notices / Coverage: how much of the target set you actually capture / Manual interventions per week to keep the pipeline running

Free first step: Data Map

Name your market and one competitor. The Map comes back with sources, collection frequency, what breaks first, and the monthly price. One page, free.

DATA / OFFERS

Start with a defined piece of work

Scraper / Data-Feed Rescue

\$1.5K to \$3K fixed

then optional monthly run

Reporting Layer

\$2K to \$5K fixed

2 to 4 weeks

Competitor & Market Monitor

\$1.5K to \$3K setup

then \$500 to \$2K per month

Data Cleanup & Enrichment

\$1K to \$3K one-off

free 1,000-row sample first

Ranges are existing offer guidance. Exact scope, price and availability are agreed before work begins.

8M+ requests/month

High-volume hotel market-data collection

Reported operating scale

Working prototype in under 24 hours

Flex Pro Grip scraping prototype; 50 of 53 records on the first pass

June 2024
