

TALENT

Experienced engineers, working inside your team.

Dedicated developers, QA and data specialists for product teams and agencies, with a practical screening process and founder oversight.

Bring in delivery capacity when the work is ready. We match engineers to the stack and task, start with a real assignment, and integrate them into your repository, tools and operating rhythm. White-label delivery is available for agency work.

What we build

White-label engineering capacity for agency overflow Dedicated developers, QA and data specialists working in your tools Technical screening and phased paid trials around a real assignment Fractional engineering support where a full-time hire is not needed

How the work is measured

Delivery throughput per sprint / Time from need to a productive engineer / Cost per shipped unit of work against a full-time hire

Free first step: Capacity Note

Built from your open roles and your stack: who would sit in the seat, how the first week runs, and how to end it if the fit is wrong. One page, free.
